 Flood (due to Heavy Rain)

 02/28/10 23:59 CST
 0
 Source: River/Stream Gage

This is a continuation of flooding from December, 2009 and January, 2010. Heavy rainfall in December, 2009, caused the White River at Clarendon to rise above flood stage. The river remained above flood stage through the entire month of January and February. Additional heavy rainfall on February 8th, combined with melting snow pack also aided in keeping the river above flood stage.

PRAIRIE COUNTY --- 2.6 ESE ENARC [35.02, -91.51], 0.9 WNW HARRYS [34.96, -91.51], 1.7 SE LETCHWORTH [34.90, -91.48], 2.8 WNW PLUNKETTS [34.92, -91.44], 1.8 WNW ERWIN [34.98, -91.46], 1.3 WSW LOST HILL [35.02, -91.45]

02/01/10 00:00 CST 0 Flood (due to Heavy Rain) 02/16/10 14:00 CST 0 Source: River/Stream Gage

This flooding is a continuation of flooding from December, 2009 and January, 2010. Heavy rainfall on the 23rd and 24th of December, 2009, caused the White River at Des Arc to rise above flood stage. The river remained above flood stage through the entire month of January and the first half of February. Additional heavy rainfall on February 8th, combined with melting snow pack also aided in keeping the river above flood stage.

WOODRUFF COUNTY --- 1.3 WNW AUGUSTA [35.29, -91.39], 2.2 SW RUFFWOOD [35.25, -91.39], 3.7 SSW RUFFWOOD [35.22, -91.40], 3.5 S RUFFWOOD [35.22, -91.37], 1.4 NE AUGUSTA [35.29, -91.35], 1.5 N AUGUSTA [35.30, -91.37]

02/01/10 00:00 CST 0 Flood (due to Heavy Rain) 02/28/10 23:59 CST 0 Source: River/Stream Gage

This is a continuation of flooding from December, 2009 and January, 2010. Heavy rainfall in December, 2009, caused the White River at Augusta to rise above flood stage. The river remained above flood stage through the entire month of January and February. Additional heavy rainfall on February 8th, combined with melting snow pack also aided in keeping the river above flood stage.

WOODRUFF COUNTY --- 1.8 SE GOODRICH [35.31, -91.21], GRAYS [35.22, -91.23], 1.8 WNW WIVILLE [35.16, -91.26], 2.2 NE GREGORY [35.17, -91.30], REVEL [35.23, -91.28], 2.1 NNE NEW SALEM [35.31, -91.27]

This flooding is a continuation of flooding from December, 2009, and January, 2010. Heavy rainfall on the 23rd and 24th of December, 2009, caused the Cache River near Patterson to rise above flood stage. The river remained above flood stage through the entire months of January and February. Additional heavy rainfall on February 8th, combined with melting snow pack also aided in keeping the river above flood stage.

Well above normal rainfall from previous months, combined with planned reservoir releases, caused many rivers across Arkansas to remain above flood stage into February. Additional heavy rainfall and melting snow pack also contributed to keeping rivers at elevated levels.

Measurable snow ine-half inch. Accumulations

Low pressure approaching from the west encountered just enough cold air and moisture to cause a small area of light snow to develop

over west central Arkansas on the morning of the 26th. Most snowfall amounts were in the range of 1 to 2 1/2 inches.
